

Accessing Commercial Financial Management Solutions with SIN 518210FM

Introduction to Special Item Number (SIN) 518210FM

The creation of this SIN was an outcome of OMB Memorandum M-19-16 and the designation of the U.S. Department of Treasury as the Financial Management Quality Service Management Office (FM QSMO). A key component of the FM QSMO program is to establish a marketplace consisting of commercially available financial management solutions to support agency requirements for cloud-computing services and cloud-related IT professional services.

SIN 518210FM differs from other SINs under the Multiple Award Schedule (MAS) Information Technology category. It has additional minimum contractor-compliance standards and additional technical-evaluation requirements that would not be suitable to layer onto other existing MAS SINs. SIN 518210FM provides ordering agencies access to FM QSMO Marketplace.

Features of SIN 518210FM

SIN 518210FM includes Core Financial Management Solutions (Core FS) and Financial Management (FM) services and solutions that are complementary to or augment Core FS and/or support agency modernizations. Offerings include financial management software suites in a cloud environment; services, applications, and modules that help agencies adopt FM QSMO solutions; and IT professional services and/or labor categories, software, and cloud-computing and IT training that support FM QSMO adoption.

Features of SIN 518210FM Subgroups

Core Financial Management Solutions (Core FS)

Core FS are partially pre-configured commercial financial management software suites offered in a cloud environment. Core FS includes offerings that are determined acceptable to meet or exceed Core FS functionality scope and Financial Management Capability Framework (FMCF) standards and that can accommodate agency-specific business needs. Items within scope of this subgroup are cloud-computing services.

Additional Financial Management Solutions

These solutions include business capabilities that augment those provided by the Core FS Baseline Solution and have a correlation to one or more Federal Financial Management (FFM) functions or activities. Solutions include cost-management solutions, reporting tools, business information exchange (BIE) solutions, FM business analytics, and intelligence. Items within scope of this subgroup are products and professional services/labor categories.

Financial Management Service/Solution Adoption and Transition Services

These services include identifying, selecting, acquiring, migrating to, and using FM QSMO Marketplace offerings effectively and efficiently. Services may also be needed when extensive or complex FM solution/service changes are released or when significant functionality is removed. These services include strategy and planning, FM data conversion and migration, Independent Verification and Validation (IV&V), readiness assessments, integration support, project management, and FM solution/service testing. Items within scope of this subgroup are products and professional services/labor categories.

Financial Management Technology Operations Support Services

These services support and help with technology implementation and operations. Services include FM technology development; testing, implementation, operations, and maintenance support; information exchanges between FM solutions and services and agency mission systems; service desk; related ancillary training; and support for legacy core financial systems. Items within scope of this subgroup are products, training, and professional services/labor categories.

Whom to Contact at the FM QSMO When Planning a Financial System Modernization

Chief Financial Officer (CFO) Act agencies should contact the FM QSMO team when they are planning a new investment for the following:

- New core financial system with related support services
- Legacy financial system technology and support services

To discuss current plans for modernization or new investments, reach out to the FM QSMO at fmqsmo@fiscal.treasury.gov. The FM QSMO will help with and support planning work and also ensure awareness around the FM QSMO Marketplace timeline.

If you are unclear on when or whether you should contact the FM QSMO, reach out to our cloud team for guidance at cloudinfo@gsa.gov.

How to Order

Easy Ordering

You can make purchases through:

- GSA eBuy at www.ebuy.gsa.gov
- GSA Advantage!® at www.gsaadvantage.gov

Ordering Process for State and Local Governments

The Cooperative Purchasing Program allows state, local, and tribal governments to purchase IT, security, and law enforcement products and services offered through specific MAS SINs. These products and services may be purchased anytime by eligible ordering activities under the Cooperative Purchasing Program. To find out whether your government entity qualifies, visit www.gsa.gov/portal/content/141511.
