

The sample files are intended to show agencies what the files could look like and for testing Broker file submissions. They are not intended to be fully submittable.

**FABS File:** The FABS file will generate FABS38.4.1 errors based on a false AwardingOfficeCode to keep the rows from being accidentally published.

*Rule FABS38.4.1: When provided, AwardingOfficeCode must be a valid value from the Federal Hierarchy, including being designated specifically as an Assistance Awarding Office in the hierarchy at the time the award was signed (per the Action Date).*

This can be easily cleared by replacing 888888 with a valid AwardingOfficeCode for the agency being tested.

The DABS files are based on the Small Business Administration (SBA) FY 2025, Period 11 DABS submission.

**File A:** The Broker-generated file based on data from GTAS.

**File B:** Has no warnings

**File C:** Will generate 12,000+ occurrences of C27.2
