Treasury Financial Manual

Part 1, Section I: Chart of Accounts

The Chart of Accounts provides the basic structure for the U.S. Standard General Ledger (USSGL). It incorporates both proprietary and budgetary accounts. The proprietary and budgetary sets of general ledger accounts are self-balancing (total debits equal total credits). It is important to note that central agency reporting requires a lower level of detail than the 6-digit USSGL account numbers provided. Therefore, the USSGL Board developed attributes containing various domain values that, when added to a basic 6-digit USSGL account, provide the appropriate level of detail needed for central agency reporting and, in effect, create new USSGL accounts. See Section IV for attribute definitions and domain values. It is this lower level of detail, the basic 6-digit USSGL account plus applicable attribute domain values, that agencies must capture at the transaction level to (1) comply with USSGL policy, and (2) achieve the desired result for proper reporting.

The basic 6-digit USSGL accounts are classified as follows:

100000 Assets

200000 Liabilities

300000 Net Position

400000 Budgetary

500000 Revenue and Other Financing Sources

600000 Expenses

700000 Gains/Losses/Miscellaneous Items

800000 Memorandum

Agencies may expand this numbering system to as many digits as necessary to accommodate agency-specific requirements. However, subsidiary accounts must summarize or “roll up” to the 6-digit USSGL accounts plus any related attributes.

In February 1999, the USSGL Board voted to delete summary accounts. However, agencies may summarize accounts as they find useful. Section headings replace many of the deleted summary accounts to maintain the integrity of the account structure.

Treasury Financial Manual

Part 1, Section III: Account Transactions

This section provides accounting transactions for events occurring throughout the federal government. The transactions illustrate both proprietary and budgetary entries for each accounting event. Transactions are grouped under the following categories:

A 100-799	Funding Sources
B 100-699	Disbursements and Payables
C 100-799	Collections and Receivables
D 100-799	Adjustments/Write-offs/Reclassifications
E 100-799	Accruals/Non-Budgetary Transfers Other Than Disbursements and Collections
F 100-499	Year-end
G 100-299	Memorandum Entries
H 100-799	Other Specialized Transaction Entries

The above categories provide a basic framework for organizing the transactions. Also included, as a quick reference, is a listing of transaction descriptions. These accounting transactions document basic standard posting logic for financial events across the federal government.

The following notes explain conventions to follow when using the USSGL and the limitations of this compilation of USSGL transactions:

- There are valid accounting events/postings not yet documented. Agencies may engage in financial activity that the USSGL Board has not yet addressed. If so, submit an issue to the USSGL Board through the agency's USSGL representative. To illustrate the issue, document accounting events specific to the activity in a simple accounting scenario. Include references to specific legislation, accounting standards, or central agency requirements that make the activity unique from those currently documented. This documentation may be useful for explaining variances from the USSGL standard to auditors.
- For deposit funds, there are valid accounting postings not yet documented. When recording any transaction in a deposit fund, agencies should not record (a) budgetary entries or (b) entries that result in net revenues, expenses, gains, or losses in nonfiduciary deposit funds. Examples of many transactions commonly used in non-fiduciary deposit funds are provided in the USSGL

- For nonexpenditure transfers of budget authority between Treasury Appropriation Fund Symbols (TAFS), the "Transfer From" entity will determine the source of funds being transferred and record a proprietary USSGL account that designates the funding as being derived from either:
 - Unexpended appropriations from general fund resources not earmarked by law for a specific purpose—USSGL account 310300, "Unexpended Appropriations—Transfers-Out," or
 - Financing sources that impact cumulative results of operations—USSGL account 576500, "Nonexpenditure Financing Sources—Transfers-Out."

The "Transfer To" entity must use a proprietary USSGL account that corresponds to the proprietary USSGL account used by the "Transfer From" entity. USSGL account 310200, "Unexpended Appropriations—Transfers-In" corresponds to USSGL account 310300. USSGL account 575500, "Nonexpenditure Financing Sources—Transfers-In" corresponds to USSGL account 576500. Failure of both entities to record the matching proprietary USSGL account category (310200/310300 or 575500/576500) will result in agency-wide and/or government-wide elimination discrepancies.

There may be mixed funding in a single TAFS. The net position of a TAFS may be a mix of:

- Unexpended appropriations derived from general fund resources not earmarked by law for a specific purpose, and
- Financing sources, such as Economy Act revenue, that impact cumulative results of operations.

To facilitate reconciliation of interagency expenses and revenues, do not post cost directly to "in-process type" asset accounts. Agencies must first record cost, such as direct labor (payroll and benefits) and direct materials that do not meet agency established capitalization thresholds, in the appropriate USSGL account 600000 series expense account. Use USSGL account 661000, "Cost Capitalization Offset" to apply the cost to the desired "in-process type" asset account. Do not record amounts applied to asset accounts under this method to USSGL account 88XXXX series accounts.

The transactions illustrate USSGL accounts without applicable attribute values. Therefore, a single transaction listed here may translate to several similar transactions in the agency's accounting system depending on how many combinations of USSGL accounts and attribute values are valid to record the agency's activities. Agencies must post transactions using the 6-digit USSGL account plus valid attribute values to fully comply with implementation of the USSGL at the transaction level and to facilitate necessary central agency reporting. Additionally, since the 6-digit base account combined with valid attributes is itself a USSGL account, agencies must post debit and credit entries to reclassify balances even when the 6-digit base account is the same.

Transactions affecting budgetary status may contain debit or credit postings to multiple USSGL status accounts that may be valid for a particular transaction. Choose a USSGL account appropriate to the status of authority in the affected TAFS and the accounting event recorded.

All transactions apply to activity with federal and non-federal entities unless limited by account definition or otherwise noted in the transaction description.

A [USSGL](#) transaction crosswalk can be obtained on the TFM website.

The transaction reference provides an example of where this transaction appears. It may not provide all possible USSGL implementation guidance that contains this transaction.

A189 To record a temporary reduction of new budgetary resources and fund balance in a trust or special fund expenditure account that was funded by an unavailable receipt account.

Comment: Post an increase in fund balance in the associated unavailable receipt account. Unlike reductions in available special and trust funds, there is no automatic appropriation of this authority in the following year. Treasury processes a warrant reducing fund balance in the expenditure account and increasing fund balance in the associated unavailable receipt account. Also post USSGL TC-A185 in the unavailable special or trust fund receipt account. Credit USSGL account 299100 if fund withdrawal does not occur simultaneously. For withdrawal of funds, see USSGL TC-A141. C430 To record an old motor vehicle that was traded in for a new motor vehicle using the direct method.

Comment: This entry is to show a trade-in only. An entry for indirect cost is not included. This is the way the Department of Defense accounts for repairable items involving trade-ins. Accounts receivable represents the cash amount the vehicle procurer will receive from the customer. Inventory held for repair represents the value of an asset after it is repaired (value of a similar new asset). Other financing source represents fair market value of the old vehicle. Other financing source was used instead of revenue from goods sold due to a trade-in, which is not a budgetary resource. Inventory allowance represents the estimated repair cost of the damaged vehicle. While it is acceptable to credit USSGL account 422100 in this situation, it is never acceptable for the balance in USSGL account 422100 to be a credit.

D514 To record the reclassification of expenses to asset accounts.

Comment: Agencies must first record all direct costs to the USSGL account 600000, "Expenses" series. When these costs are subsequently capitalized to the appropriate "in process" asset or "finished product" asset account, or the costs result in the recording of an asset from an Assisted Acquisition with another federal entity, these amounts should then be offset by recording SGL 661000, "Cost Capitalization Offset." This process allows agencies to accumulate their cost information and facilitates the proper elimination of interagency expenses/revenues.

Treasury Financial Manual

Part 1, Section IV: USSGL Account Attributes

To meet external reporting requirements, agencies need data at a level below the 6-digit USSGL account. Agencies' systems must capture this information at the transaction level by recording transactions using USSGL 6-digit accounts plus attributes. This section provides an Attribute Definition Report and an Attribute Table for both proprietary and budgetary USSGL accounts and attributes reported to the Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS).

The Attribute Definition report provides definitions and related information for all attributes associated with each entry. Agencies report on those attributes described in the detailed financial information entity. The Attribute Table shows USSGL accounts, account titles, and normal balance indicators for USSGL accounts that agencies use for GTAS reporting. Also, the tables show related attributes agencies must provide for each USSGL account reported in GTAS.

The USSGL proprietary account data in the Attribute Table shows the related attribute information captured at the transaction level that support production of the *Financial Report of the United States Government*. The USSGL crosswalks for the financial statements reference these attributes as a requirement for proper reporting on the particular financial statement line items.

Attributes are like adjectives that further describe a USSGL account in order to meet a specific reporting requirement. Domain values are all of the possible valid choices within an attribute. For example, if there is a red chair and a blue chair in a room, then you only need one attribute to describe them: color. The valid domain values within the attribute "color" would be "red" or "blue." If you wanted the red chair, there would be no need to use additional adjectives such as weight, height, or size to describe it. This is because, in this example, color is enough to uniquely identify the chair. Therefore, only those attributes and those domain values that are necessary to uniquely identify the reporting requirement appear on the crosswalks.

Note:

Some USSGL accounts do not have certain attributes in this document for reporting purposes, but do require these attributes for accounting purposes. An example is downward adjustments of prior -year obligations. For reporting purposes, the following USSGL Accounts do not need the reimbursable flag attribute with the domain values of direct and reimbursable: USSGL accounts 487100, "Downward Adjustments of Prior-Year Unpaid Undelivered Orders—Obligations, Recoveries," 487200, "Downward Adjustments of Prior-Year Prepaid/Advanced Undelivered Orders—Obligations, Refunds Collected," 497100, "Downward Adjustments of Prior-Year Unpaid Delivered Orders—Obligations, Recoveries," and 497200, "Downward Adjustments of Prior-Year Paid Delivered Orders—Obligations, Refunds Collected." However, at year-end these accounts close to the following USSGL accounts which require the reimbursable flag attribute for reporting: USSGL accounts 480100, "Undelivered Orders—Obligations, Unpaid," 480200, "Undelivered Orders—Obligations, Prepaid/Advanced," 490100, "Delivered Orders—Obligations, Unpaid," and 490200, "Delivered Orders—Obligations, Paid." Therefore, an agency must similarly identify the adjustment accounts to close these accounts properly.

Treasury Financial Manual

Part 1, Section V: USSGL Crosswalks to Standard External Reports

These crosswalks map USSGL accounts to external reports in accordance with current reporting guidance from the Office of Management and Budget (OMB), the Federal Accounting Standards Advisory Board (FASAB), and the Bureau of the Fiscal Service (Fiscal Service).

Each report crosswalk lists the proper USSGL accounts and applicable attributes for each line and/or column on the reports. Attributes identify information subsidiary to the basic 6-digit USSGL accounts. This subsidiary information is necessary to meet external reporting requirements. See Section IV for additional information on attributes.

All crosswalks require pre-closing USSGL account balances.

The following are crosswalks from the USSGL Chart of Accounts to standard external reports required by OMB and Fiscal Service:

FOOTNOTES AND ADDITIONAL INFORMATION:

1	When the same SBR line number uses both a beginning (B) and ending (E) balance for the same USSGL account, the beginning balance is subtracted from the ending balance.
2	Anticipated amounts should be zero for the yearend preclosing trial balance.
3	This row corresponds with SF133/Schedule P line 1020. However, budgetary and financial statement requirements for reporting adjustments differ from one another. For budgetary reporting, materiality thresholds do not apply, whereas for financial statement reporting, materiality thresholds do apply. Ending balances with a PYA (Prior Year Adjustment) are included in this row.
4	USSGL account balance must be zero for the year end preclosing trial balance.

2	As defined in TFM, Volume I, Part 2, Chapter 4700, Federal Entity Reporting Requirements for the Financial Report of the United States Government.							
3	Seigniorage is defined as "Other Financing Sources" (see SFFAS No. 7, paragraph 305) and has a non-Federal attribute. A new line to accommodate seigniorage with an "N" attribute was not added to the "Other Financing Sources" line since seigniorage does not meet the Financial Report's materiality threshold. As a result, seigniorage was added to the "Other Taxes and Receipts" line instead.							
4	Exclude General Fund of the U.S. Government activity in this account.							
5	Budgetary portion only.							
6	Non budgetary portion only.							
7	This line now includes amounts previously captured in lines 7.10 and 7.11. If a new RC is established then the data can be segregated.							
8	This line now includes amounts previously captured in lines 8.4 and 8.5. If a new RC is established then the data can be segregated.							
9	When comparative financial statements are presented, the error is material and financial statements are restated the correction will be to the previous year financial statement lines. The impact to the current year will be presented in the beginning balances. Guidance is provided in the Prior Period Adjustment scenario on the following page: https://www.fiscal.treasury.gov/files/ussgl/approved_scenarios/ppa-due-to-correction-of-errors.pdf

Treasury Financial Manual

Part 1, Section VII: GTAS Validations and Edits

One of the goals the Bureau of the Fiscal Service (Fiscal Service) has envisioned for GTAS is to improve the consistency in agency trial balance reporting. This will be accomplished through validations and edits.

The validations ensure that the attributes reported in agencies' GTAS trial balance submissions are valid for the USSGL account. The validations encompass both USSGL level attributes per the USSGL Attribute Table and Treasury Account Symbol (TAS) level attributes found in the Super Master Account (SMAF). Simple validations are those involving one attribute while special validations involve more than one attribute. All validations are fatal.

The edits compare the agency trial balances with USSGL rules and with data from authoritative sources such as the Central Accounting Reporting System (CARS), Fiscal Service, and the Federal Financing Bank. The edits may be either fatal or proposed. Fiscal Service will use the proposed edits only for analytical purposes. Fiscal Service disclaims any role or responsibility with the agency auditor relationship concerning the GTAS fatal and proposed analytical edits.

The following are the validation and edit reports included in this section:
